## FINANCIAL AND COMMERCIAL.

SUNDAY, April 22, 1866. There was a moderately active but somewhat irregular peculative movement on the Stock Exchange during the sast week. Railway shares at the opening were par-ally neglected in favor of the miscellaneous stocks. neglected in favor of the miscellaneous stocks, were buoyant; but afterwards interest in the lat ch suffered a relapse, waned, and the forms ame stronger, with an increasing volume of trans, and the market closed with a firm upward dency, the following being the quotations at half-past five yesterday afternoon:—New York Central 92% a 93, Erie 73% a %, Hudson River 108% a 109, Reading 104% higan Southern 82% a %, Illinois Central 114 a land and Pittsburg 81% a %, Rock Island 121% a %, Northwestern 27% a %, preferred 58% a %, Fort Wayne 97% a %, Ohio and Mississippi certificates 25% The most mercurial of the railway stocks was Fort Wayne, which rose to 98%, against 91 on the 18th inst, under a chaue movement, apparently organized to "corner" the "shorts" in it, which were known to be considerable. Hudson River showed great es under the report of its largely increa earnings as compared with the same month last year. Erie was active and rather spasmodic in its action for so which led the street to suppose it on the eve of one of those eccentric upward turns to which it is lly given after a heavy decline. Cleveland and Pittsburg fluctuated feverishly, as if it were being ght largely by parties who at the same time desired es. Michigan Southern was strong and fairly rise in Ohio and Mississippi certificates; and Mari-posa preferred, after selling up to 24, fell back to closing at 22, however. Quicksilver, too, galvanized into transient activity, and rose 57, against 40 a fortnight ago, but it soon sed to 51. Spruce Hill Coal was rather actively dealt in at 6 a 6 % at the open board, and on Saturday the stock of this company, which has a capital of a mil-lion, in a hundred thousand shares of ten dollars each, nitted to the list of the Stock Exchange. The report submitted to the board shows that the pany has no debt, and owns, under a per-title, eight hundred acres of coal land in of the coal basin lying between the towns of Cumberland and Frostburg, in Allegbany Maryland, ten miles from the Baltimore and Ohio Railroad and the Cumberland terminus of th apeake and Ohio Canal. There are two openings on operty, one of which is in operation, surrounde y all the appurtenances necessary to successful mining. Government securities were active and strong, all de

scriptions having materially improved under the foreign advices reporting an advance of five-twenties in London to 72% a % and the extreme ease of the money market at this centre. The rise in the gold-bearing was equal to one per cent, and in seven-thirty notes to 1% a 3. Temporary investments have been made in the last mentioned to a large extent by the banks and capitalists unable to find employment in the way of Stock Exchange loans and discounts for their funds, and private individuals have latterly been trans as much as might be convenient of their personal

There is every prospect that the prevailing monetary se will be long continued, as no funding or conversion rocess which the Treasury can adopt will be likely to isturb the flow of money in the least. If a long five per cent loan is ultimately put upon the market it will be simply a bid for seven-thirty notes, and will in no case be cess unless Congress previously legislates that the inter-est on five-twenties is to be reduced to five per cent, with the privilege of conversion, after the option accrues to ment. In this connection we may mention the 1st of May next year, and the remainder of has wisely given notice that after the 1st of May next nore than a hundred and twenty millions of this form of loan in time of peace, and while its idle balance in the New York Sub-Treasury, including coin, is more

s have generally been made at call to the Stock in favor of New York, and the receipts of cur eased firmness of gold and foreign exchang In breadstuffs there is a good deal of speculative suppor to the market, shown both here and at the West, which gives strength to prices; but in the dry goods trade there is a lack of animation, and business closed dull under the decline of half a cent per pound in raw cotton, consequent upon the Persia's advices from Liverpool. Nev-ertheless, the steady demand for consumption prevents any considerable loss of confidence in any department of

The gold market has been firm under a demand for \$2,570,955 for customs duties and the scarcity of coin for delivery, loans having commanded on an average about 3-16ths per cent per diem. The export for the week aggregated only \$117,312. The extreme range of the market during the week has been from 125% to 127%, the closing quotation being 126% a M.
Foreign exchange advanced on Monday to 107% a 108

for bankers' bills on England at sixty days, with a large heavy amount of five-twenties, in the event of Austria and Prussia drifting into war. On the receipt of the Persia's reassuring advices, however, the rate relaxed to 107 ½ a ½, and closed steady at about 107%. Three days bills were quoted on Saturday at 108% a ½, commercial 106% a ¾, france 5.25 a 25%, short sight 5.18% a 5.20, bills on Berlin 70 a M., Bromen 76 M a 77 M. Frankfort 40 M. a M., Amsterdam 40 a M., Hamburg 35 M a M. The receipts of cotton at all the ports are still large, those for the past week having been about 42,000 bales, while the exports were 50,000, of which for the week ending with the 18th inst. 21,000 were from this port. The receipts were for the week ending with the 20th 12,600 bates. 215,000, and at all the principal ports 490,000 bales. The stock of cotton at Liverpgol on the 7th inst, was estimated at 663,840 bales, and in London at 58,684 bales, making with 80,000 bales supposed to be at Havre and elsewhere on the continent 802,424 bales. In addition to this there were affect according to advices re-ceived about 689,000 bales of Indian and 135,000 bales of United States. The wonder is, under such circumstances, that the price of the staple should be so well naintained abroad, and not that a slight d cline should have been the result of the large importations, the rapidly accumulating stock, the continued large receipts at our own Southern ports, and similar advices from

The following statement of the imports of cotton into the United Kingdom, during January and February, in this and the two previous years, calculated in bundred weights, shows the immense increase of receipts from this country, and the general sources of supply. From

The Chicago Republican of the 19th says:—

We learn from Houghton, Mich., of the failure of the Pennsylvania and Delaware Mining Companies. The stockholders have for some time hoped against hope, and their corporations not being copper bottomed, have at last been added to the aircady long list of wrecks with which the shores of Lake Superior are strewn. The Pennsylvania mine was formerly called the "North-west," and was, it we are not mistaken, originally started by Horace Greeley, who obtained a lease of the ground from the general government. It has sunk, at an inside estimate, \$1,000,000, in addition to the copper received. The Delaware is an off-shoot from the same mine, and has sunk about \$400,000.
